This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Interval-valued fuzzy DEMATEL was developed to determine the relative weights.
- Uncertainties and multiple stakeholders were incorporated in this method.
- Interval-valued fuzzy GRA method was used to prioritize MSW treatment scenarios.
- Prioritization method for ranking MSW treatment scenarios was developed.
