Boundary retention layer influence on permeability of tight reservoir

Haibo Li, Hekun Guo, Zhengming Yang, Xuewu Wang, Yuping Sun, Hongcheng Xu, Hwen Zhang, Haibing Lu, Huan Meng

PII: S0920-4105(18)30411-X

DOI: [10.1016/j.petrol.2018.05.019](https://doi.org/10.1016/j.petrol.2018.05.019)

Reference: PETROL 4942

To appear in: *Journal of Petroleum Science and Engineering*

Received Date: 22 February 2018

Revised Date: 13 April 2018

Accepted Date: 5 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Capillary model considering boundary retention layer
