Crushing characteristics of four different proppants and implications for fracture conductivity

Wenbo Zheng, Suyanne Costa Silva, Dwayne D. Tannant

PII: S1875-5100(18)30098-2

DOI: [10.1016/j.jngse.2018.02.028](https://doi.org/10.1016/j.jngse.2018.02.028)

Reference: JNGSE 2484

To appear in: *Journal of Natural Gas Science and Engineering*

Received Date: 11 July 2017

Revised Date: 8 January 2018

Accepted Date: 24 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Crushing characteristics of four different proppants and implications for fracture conductivity
