

Accepted Manuscript

Analysis of Young's modulus for Carboniferous sedimentary rocks and its relationship with uniaxial compressive strength using different methods of modulus determination

Piotr Małkowski, Łukasz Ostrowski, Jarosław Brodny

PII: S2300-3960(17)30104-0

DOI: [10.1016/j.jsm.2018.07.002](https://doi.org/10.1016/j.jsm.2018.07.002)

Reference: JSM 95

To appear in: *Journal of Sustainable Mining*

Received Date: 24 November 2017

Revised Date: 26 April 2018

Accepted Date: 1 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Analysis of Young's modulus for Carboniferous sedimentary rocks and its relationship with uniaxial compressive strength using different methods of modulus determination
