Space Weathering Trends on Carbonaceous Asteroids: A possible explanation for Bennu's blue slope?

C. Lantz, R.P. Binzel, F.E. DeMeo

PII: S0019-1035(17)30584-5
DOI: [10.1016/j.icarus.2017.11.010](https://doi.org/10.1016/j.icarus.2017.11.010)
Reference: YICAR 12694

To appear in: *Icarus*

Received date: 11 August 2017
Revised date: 27 October 2017
Accepted date: 6 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Analysis of Near-Earth Asteroid spectra compared to irradiated carbonaceous chondrites.
- Link between Principal Component Analysis scores and spectral curvature.
- Evolution of primitive NEAs upon space weathering.
- Application to (101955) Bennu.
