Laboratory photometry of regolith analogues: effect of porosity

A. Kar, A.K. Sen, R. Gupta

PII: S0019-1035(16)30201-9  
DOI: [10.1016/j.icarus.2016.05.024](https://doi.org/10.1016/j.icarus.2016.05.024)  
Reference: YICAR 12072

To appear in: *Icarus*

Received date: 31 October 2015  
Revised date: 10 May 2016  
Accepted date: 12 May 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We have added one very recent work by us viz. Deb & Sen 2016 in page 3, 9 lines up.
- We have redrawn figures (3-9), for better clarity.
- Discussions and conclusions have been modified with more scientific justifications to explain cases for reflectance of alumina; single particle albedo and sample compactness; relation between roughness, porosity and reflectance.
