Impact of lateral boundary and initial conditions in the prediction of Bay of Bengal cyclones using WRF model and its 3D-VAR data assimilation system

K.S. Singh, PrasadK. Bhaskaran

PII: S1364-6826(17)30684-3

DOI: [10.1016/j.jastp.2018.05.007](https://doi.org/10.1016/j.jastp.2018.05.007)

Reference: ATP 4853

To appear in: *Journal of Atmospheric and Solar-Terrestrial Physics*

Received Date: 4 December 2017

Revised Date: 22 May 2018

Accepted Date: 24 May 2018

Please cite this article as: Singh, K.S., Bhaskaran, P., Impact of lateral boundary and initial conditions in the prediction of Bay of Bengal cyclones using WRF model and its 3D-VAR data assimilation system, *Journal of Atmospheric and Solar-Terrestrial Physics* (2018), doi: 10.1016/j.jastp.2018.05.007.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Impact of lateral boundary and initial conditions in the prediction of Bay of Bengal cyclones using WRF model and its 3D-VAR data assimilation system
