Case study of an ice void structure in polar mesospheric clouds

Brentha Thurairajah, Scott M Bailey, David E Siskind, Cora E Randall, Michael J Taylor, James M RussellIII

www.elsevier.com/locate/jastp

PII: S1364-6826(13)00050-3
DOI: <http://dx.doi.org/10.1016/j.jastp.2013.02.001>
Reference: ATP3772

To appear in: *Journal of Atmospheric and Solar-Terrestrial Physics*

Received date: 23 May 2012
Revised date: 17 December 2012
Accepted date: 5 February 2013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
