This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Power law with exponent  $-1.1 \pm 0.5$  is found in power spectrum.
- Signatures of intermittent dynamics are found in power spectrum.
- Longer time dynamics is determined by the modes with larger eigenvalues.
