Analysis of Magnetohydrodynamic Flow of a Fractional Viscous Fluid Through a Porous Medium

Sami Ul Haq , Muhammad Atif Khan , Nehad Ali Shah

PII: S0577-9073(17)31261-3  
DOI: [10.1016/j.cjph.2017.12.020](https://doi.org/10.1016/j.cjph.2017.12.020)  
Reference: CJPH 422

To appear in: *Chinese Journal of Physics*

Received date: 3 October 2017  
Revised date: 9 December 2017  
Accepted date: 23 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Caputo-Fabrizio derivative has been used with joint Fourier and Laplace Transform.
- Combined effect of magnetic and porosity has been investigated.
- Time required to reach the steady state has been identified.
- Solutions for Classical time derivative are also recovered.
