Effect of post-transcriptional feedback on the stochastic effect in gene expression

Changhong Shi , Shuqiang Wang , Honglian Ruan

PII: S0577-9073(17)30852-3  
DOI: [10.1016/j.cjph.2017.10.006](https://doi.org/10.1016/j.cjph.2017.10.006)  
Reference: CJPH 364

To appear in: *Chinese Journal of Physics*

Received date: 9 July 2017  
Revised date: 20 October 2017  
Accepted date: 21 October 2017

Please cite this article as: Changhong Shi , Shuqiang Wang , Honglian Ruan , Effect of post-transcriptional feedback on the stochastic effect in gene expression, *Chinese Journal of Physics* (2017), doi: [10.1016/j.cjph.2017.10.006](https://doi.org/10.1016/j.cjph.2017.10.006)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- The exact solution of a model of post-transcriptional feedback is obtained
- The stochastic deviation can be caused by enzyme fluctuation and feedback.
- The gain in stochastic deviation is generally obtained at the cost of large noise.
