This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Influence of image resolution on the performance of remote breathing rate
measurement using thermal imaging technique**

Yuanchun Chen^a

^a *Institute of Image Communication and Information Processing, Shanghai Jiao Tong
University, Shanghai 200240, PR China;*

Highlights

- 1) Thermal imaging technique can be used for the unwired and unobtrusive breathing rate measurement.
- 2) Influence of image resolution on BR measurement performance is researched.
- 3) Design of thermal imaging system in a specific application scenario should select the suitable image resolution.
