

## Accepted Manuscript

Infrared thermography, a new method for detection of brown adipose tissue activity after a meal in humans

Nikola Habek, Milan Kordić, Franjo Jurenec, Aleksandra Dugandžić

PII: S1350-4495(17)30516-9  
DOI: <https://doi.org/10.1016/j.infrared.2018.01.020>  
Reference: INFPHY 2478

To appear in: *Infrared Physics & Technology*

Received Date: 20 August 2017  
Revised Date: 6 January 2018  
Accepted Date: 17 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Infrared thermography, a new method for detection of  
brown adipose tissue activity after a meal in humans
