Charge compensation mechanisms in favor of the incorporation of the Eu^{3+} ion into the ZnO host lattice

M. Baira, A. Bekhti-Siad, K. Hebali, H. Bouhani-Benziane, M. Sahnoun

PII: S0921-4526(18)30155-8

DOI: [10.1016/j.physb.2018.02.035](https://doi.org/10.1016/j.physb.2018.02.035)

Reference: PHYSB 310752

To appear in: *Physica B: Physics of Condensed Matter*

Received Date: 25 October 2017

Revised Date: 13 February 2018

Accepted Date: 21 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Charge compensation mechanisms in favor of the Eu^{3+} ion into**
2 **the ZnO host lattice**
