Precision of estimation and entropy as witnesses of non-Markovianity
in the presence of random classical noises

H. Rangani Jahromi, M. Amniat-Talab

PII: S0003-4916(15)00213-4

DOI: <http://dx.doi.org/10.1016/j.aop.2015.05.022>

Reference: YAPHY 66852

To appear in: *Annals of Physics*

Received date: 16 March 2015

Accepted date: 18 May 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

Highlights

1. Presenting a new interpretation of non-Markovianity in open quantum systems.
2. Illustratively unveiling a fundamental relationship between the dynamics of the entropy and non-Markovian behaviour in the presence of random classical noises.
3. Presenting a complete analysis of Parameter estimation in classical environments.
