This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Vehicle/Pedestrian interactions at an un-signalized intersection are investigated.
- Flux and phase diagrams for vehicles are simulated.
- Vehicles changing lane, crosswalk position, have significant effect on phase diagrams.
