Network Science of Biological Systems at Different Scales: A Review

Marko Gosak, Rene Markovič, Jurij Dolenšek, Marjan Slak Rupnik, Marko Marhl et al.

PII: S1571-0645(17)30150-1
DOI: <https://doi.org/10.1016/j.plrev.2017.11.003>
Reference: PLREV 934

To appear in: *Physics of Life Reviews*

Received date: 12 September 2017
Revised date: 13 October 2017
Accepted date: 15 October 2017

Please cite this article in press as: Gosak M, et al. Network Science of Biological Systems at Different Scales: A Review. *Phys Life Rev* (2017), <https://doi.org/10.1016/j.plrev.2017.11.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Network science offers a comprehensive toolset for exploring biological systems.
- Intercellular interaction patterns can be successfully studied by network approaches.
- The emergent field of multilayer networks is promising for biological data analysis.
