

Accepted Manuscript

A backpack γ -spectrometer for measurements of ambient dose equivalent rate, $H^*(10)$, from ^{137}Cs and from naturally occurring radiation: The importance of operator related attenuation

V. Ramzaev, C. Bernhardsson, A. Barkovsky, I. Romanovich, J. Jarneborn, S. Mattsson, A. Dvornik, S. Gaponenko

PII: S1350-4487(17)30409-2

DOI: [10.1016/j.radmeas.2017.10.002](https://doi.org/10.1016/j.radmeas.2017.10.002)

Reference: RM 5844

To appear in: *Radiation Measurements*

Received Date: 15 June 2017

Revised Date: 7 September 2017

Accepted Date: 5 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A backpack γ -spectrometer for measurements of ambient dose equivalent rate, $\dot{H}^*(10)$, from ^{137}Cs and from naturally occurring radiation: the importance of operator related attenuation
