This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: TOP2A induces malignant character of pancreatic cancer through activating β -catenin signaling pathway

Running Title: Mir-139\TOP2A\ β -catenin axis in pancreatic cancer

Authors: Yao-fei Pei ^{a,b*}, Xi-min Yin ^c, Xi-qiang Liu ^{b*}

Authors' Affiliations:

- a. Department of General Surgery, Shanghai First People's Hospital Affiliated to Shanghai JiaoTong University, Shanghai 200080, PR China.
- b. Department of Hepatobiliary-Pancreatic Surgery, Zhejiang Provincial People's Hospital, Hangzhou, Zhejiang Province 310014, PR China.
- c. Department of Hepatobiliary and Minimally Invasive Surgery, Hunan Provincial People's Hospital, Changsha, Hunan Province 410005, PR China.
