

Accepted Manuscript

Reaction time in healthy elderly is associated with chronic low-grade inflammation and advanced glycation end product

Pauline Arnold, Rose Njemini, Stijn Vantieghem, Ellen Gorus, Annelies Pool-Goudzwaard, Ronald Buyl, Ivan Bautmans

PII: S0531-5565(18)30035-4
DOI: doi:[10.1016/j.exger.2018.04.002](https://doi.org/10.1016/j.exger.2018.04.002)
Reference: EXG 10328
To appear in: *Experimental Gerontology*
Received date: 17 January 2018
Revised date: 21 February 2018
Accepted date: 2 April 2018

Please cite this article as: Pauline Arnold, Rose Njemini, Stijn Vantieghem, Ellen Gorus, Annelies Pool-Goudzwaard, Ronald Buyl, Ivan Bautmans , Reaction time in healthy elderly is associated with chronic low-grade inflammation and advanced glycation end product. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Exg*(2017), doi:[10.1016/j.exger.2018.04.002](https://doi.org/10.1016/j.exger.2018.04.002)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Reaction Time in healthy elderly is associated with chronic low-grade inflammation and Advanced Glycation End product.
