Conservative Fluid Management Prevents Age-Associated Ventilator Induced Mortality

Joseph A. Herbert, Michael S. Valentine, Nivi Saravanan, Matthew B. Schneck, Ramana Pidaparti, Alpha A. Fowler III, Angela M. Reynolds, Rebecca L. Heise

PII: S0531-5565(16)30140-1
DOI: doi: [10.1016/j.exger.2016.05.005](https://doi.org/10.1016/j.exger.2016.05.005)
Reference: EXG 9843

To appear in: *Experimental Gerontology*

Received date: 9 November 2015
Revised date: 9 May 2016
Accepted date: 13 May 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Conservative Fluid Management Prevents Age-Associated Ventilator Induced Mortality
