Red blood cells open promising avenues for longitudinal studies of ageing in laboratory, non-model and wild animals

Antoine Stier, Sophie Reichert, Francois Criscuolo, Pierre Bize

PII: S0531-5565(15)30044-9
DOI: doi: [10.1016/j.exger.2015.09.001](https://doi.org/10.1016/j.exger.2015.09.001)
Reference: EXG 9691

To appear in: *Experimental Gerontology*

Received date: 7 May 2015
Revised date: 1 September 2015
Accepted date: 2 September 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Red blood cells open promising avenues for longitudinal studies of ageing in laboratory, non-model and wild animals
