Poly(ADP-ribose) in the bone: from oxidative stress signal to structural element

Csaba Hegedűs, Agnieszka Robaszkiewicz, Petra Lakatos, Éva Szabó, László Virág

www.elsevier.com/locate/freerad-biomed

PII: S0891-5849(15)00034-9
DOI: <http://dx.doi.org/10.1016/j.freeradbiomed.2015.01.027>
Reference: FRB12295

To appear in: *Free Radical Biology and Medicine*

Received date: 11 November 2014
Revised date: 20 January 2015
Accepted date: 26 January 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
