IgG4-related disease and intracranial hypertension: Case report of a novel mechanistic association

Jennifer Healy, Kaye Sedarsky, Patrick Malafronte, Nathan T. Tagg

PII: S0022-510X(17)34504-5
DOI: doi:[10.1016/j.jns.2017.12.013](https://doi.org/10.1016/j.jns.2017.12.013)
Reference: JNS 15701

To appear in: *Journal of the Neurological Sciences*

Received date: 10 October 2017
Revised date: 16 November 2017
Accepted date: 12 December 2017

Please cite this article as: Jennifer Healy, Kaye Sedarsky, Patrick Malafronte, Nathan T. Tagg , IgG4-related disease and intracranial hypertension: Case report of a novel mechanistic association. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Jns*(2017), doi:[10.1016/j.jns.2017.12.013](https://doi.org/10.1016/j.jns.2017.12.013)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Manuscript Number: JNS 15701

IgG4-Related Disease and Intracranial Hypertension: Case Report of A Novel Mechanistic Association

Jennifer Healy¹ BS, Kaye Sedarsky MD², Patrick Malafronte MD², Nathan T. Tagg MD²

Corresponding Author: Nathan T. Tagg, MD
