This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Can patients without early, prominent visual deficits still be diagnosed of Posterior Cortical Atrophy?

Authors: Suárez-González A^{a,b*}, Crutch SJ^a, Roldán Lora F^c, Emilio Franco Macias^b, Gil-Néciga E^b

Affiliations:

a. Dementia Research Centre, Department of Neurodegenerative Disease, UCL Institute of Neurology, University College London, London, United Kingdom.

b. Memory Disorders Unit, Neurology Department, University Hospital Virgen del Rocío, Seville, Spain

c. Department of Radiology, University Hospital Virgen del Rocío, Seville, Spain.

Author for correspondence: Aida Suárez-González. Dementia Research Centre, Box 16, National Hospital for Neurology and Neurosurgery, Queen Square, London, WC1N 3BG, UK. E-mail: aida.gonzalez@ucl.ac.uk
Telephone: 44 020-3448-83655

Running title: Posterior cortical atrophy without early visual impairment

Word count: 2,286

Keywords: Alzheimer's disease; posterior cortical atrophy; visual function; apraxia; parietal lobe.
