Running head: Cognition in iRBD

There are no conflicts of interest.

The study was supported by the China-Japan Friendship Hospital (2014-4-QN-32).

The corrections were labelled on red color.

Answers to Reviewer 4:

The manuscript was edited by the highly qualified native English speaking editors at American Journal Experts again.

Abstract

Aims: We investigated cognitive abnormalities using standard tests in Chinese patients with idiopathic rapid eye movement (REM) sleep behavior disorder (iRBD) compared with those in normal controls.
