This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Menopausal symptoms after breast cancer are common and may be severe.
 - Menopausal symptoms may lead to decreased compliance with adjuvant hormonal therapy.
 - Multidisciplinary care is associated with improved outcomes after breast cancer.
-

Managing menopausal symptoms after breast cancer – a multidisciplinary approach
