Title: *Tropomyosin 2* heterozygous knockout in mice using CRISPR-Cas9 system displays the inhibition of injury-induced epithelial-mesenchymal transition, and lens opacity

Authors: Teppei Shibata, Shinsuke Shibata, Yasuhito Ishigaki, Etsuko Kiyokawa, Masahito Ikawa, Dhirendra P. Singh, Hiroshi Sasaki, Eri Kubo

PII: S0047-6374(17)30287-7
DOI: <https://doi.org/10.1016/j.mad.2018.03.001>
Reference: MAD 11032

To appear in: *Mechanisms of Ageing and Development*

Received date: 23-11-2017
Revised date: 28-1-2018
Accepted date: 1-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Tropomyosin 2* heterozygous knockout in mice using CRISPR-Cas9 system displays the inhibition of injury-induced epithelial-mesenchymal transition, and lens opacity**

Teppei Shibata¹, Shinsuke Shibata¹, Yasuhito Ishigaki³, Etsuko Kiyokawa², Masahito Ikawa⁴,
Dhirendra P Singh⁵, Hiroshi Sasaki¹ and Eri Kubo¹
