Increased glutamate + glutamine levels in the thalamus of patients with essential tremor: A preliminary proton MR spectroscopic study

Gaetano Barbagallo, Gennarina Arabia, Fabiana Novellino, Rita Nisticò, Maria Salsone, Maurizio Morelli, Federico Rocca, Andrea Quattrone, Manuela Caracciolo, Umberto Sabatini, Andrea Cherubini, Aldo Quattrone

PII: S1353-8020(17)30811-8

DOI: [10.1016/j.parkreldis.2017.11.345](https://doi.org/10.1016/j.parkreldis.2017.11.345)

Reference: PRD 3489

To appear in: *Parkinsonism and Related Disorders*

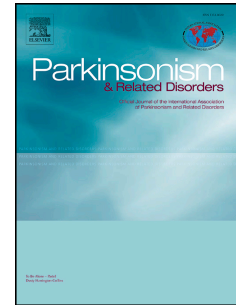

Received Date: 28 July 2017

Revised Date: 12 October 2017

Accepted Date: 27 November 2017

Please cite this article as: Barbagallo G, Arabia G, Novellino F, Nisticò R, Salsone M, Morelli M, Rocca F, Quattrone A, Caracciolo M, Sabatini U, Cherubini A, Quattrone A, Increased glutamate + glutamine levels in the thalamus of patients with essential tremor: A preliminary proton MR spectroscopic study, *Parkinsonism and Related Disorders* (2017), doi: 10.1016/j.parkreldis.2017.11.345.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

*Full-length Article***Increased glutamate + glutamine levels in the thalamus of patients with essential tremor:
a preliminary proton MR spectroscopic study**

Abstract word count: 250

Main text word count: 2978

Number of references: 30

Number of figures: 3

Number of tables: 1

Supplementary material: Table e-1

Key words: magnetic resonance imaging, proton magnetic resonance spectroscopy; essential tremor; thalamus; glutamatergic transmission.
