This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title

Cold Atmospheric-pressure Nitrogen Plasma Induces the Production of Reactive Nitrogen Species and Cell Death by Increasing Intracellular Calcium in HEK293T Cells

Katsuya Iuchi^{1*}, Yukina Morisada¹, Yuri Yoshino¹, Takahiro Himuro², Yoji Saito², Tomoyuki Murakami², Hisashi Hisatomi¹
