Characterisation of peroxidase activity in isolated extracellular matrix and direct detection of hypobromous acid formation

Boushra Bathish, Rufus Turner, Martina Paumann-Page, Anthony J. Kettle, Christine C. Winterbourn

PII: S0003-9861(17)30859-7

DOI: [10.1016/j.abb.2018.03.038](https://doi.org/10.1016/j.abb.2018.03.038)

Reference: YABBI 7698

To appear in: *Archives of Biochemistry and Biophysics*

Received Date: 20 December 2017

Revised Date: 29 March 2018

Accepted Date: 30 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Characterisation of peroxidase activity in isolated extracellular matrix and direct detection of hypobromous acid formation

Boushra Bathish, Rufus Turner, Martina Paumann-Page, Anthony J Kettle and Christine C Winterbourn

Centre for Free Radical Research, Department of Pathology and Biomedical Science,
University of Otago Christchurch, Christchurch, New Zealand

Running title: HOBr formation and collagen IV cross-linking by peroxidase

Address for correspondence:
