Insights on the conformational dynamics of human frataxin through modifications of loop-1

Martín E. Noguera, Martín Aran, Clara Smal, Diego S. Vazquez, María Georgina Herrera, Ernesto A. Roman, Nadine Alaimo, Mariana Gallo, Javier Santos

PII: S0003-9861(17)30461-7

DOI: 10.1016/j.abb.2017.10.022

Reference: YABBI 7589

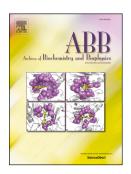

To appear in: Archives of Biochemistry and Biophysics

Received Date: 8 July 2017

Revised Date: 20 October 2017 Accepted Date: 28 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running title: Dynamics of loop-1 mutants of frataxin

Highlights

- Loop-1 mutants of frataxin were designed to alter conformational dynamics.
- Tertiary structure is mainly unaffected by the mutations.
- Mutations result in both local and long-range effects on dynamics.
- Iron binding and cysteine desulfurase activation are differentially affected.
