This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Basolateral cholesterol depletion alters Aquaporin-2 post-translational modifications and disrupts apical plasma membrane targeting

Authors: Hanne B. Moeller, Cecilia Hvitfeldt Fuglsang, Cecilie Nøhr Pedersen and Robert A. Fenton

InterPrET Center, Department of Biomedicine, Aarhus University, Aarhus, Denmark

Running Title: Cholesterol-dependent AQP2 trafficking

Address for correspondence: Hanne B Moeller (HBMO@biomed.au.dk), Department of Biomedicine South, Bldg. 1233, 3 Wilhelm Meyers Alle, Aarhus University, Aarhus 8000, Denmark.
