Binding of ferredoxin to algal photosystem I involves a single binding site and is composed of two thermodynamically distinct events

Pini Marco, Marina Kozuleva, Haviva Eilenberg, Yuval Mazor, Peter Gimeson, Andrey Kanygin, Kevin Redding, Iftach Yacoby

PII: S0005-2728(18)30001-X

DOI: <https://doi.org/10.1016/j.bbabbio.2018.01.001>

Reference: BBABIO 47860

To appear in:

Received date: 24 September 2017

Revised date: 7 January 2018

Accepted date: 8 January 2018

Please cite this article as: Pini Marco, Marina Kozuleva, Haviva Eilenberg, Yuval Mazor, Peter Gimeson, Andrey Kanygin, Kevin Redding, Iftach Yacoby , Binding of ferredoxin to algal photosystem I involves a single binding site and is composed of two thermodynamically distinct events. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Bbabbio(2018), <https://doi.org/10.1016/j.bbabbio.2018.01.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Binding of ferredoxin to algal photosystem I involves a single binding site and is composed of two thermodynamically distinct events

Pini Marco¹, Marina Kozuleva¹, Haviva Eilenberg¹, Yuval Mazor², Peter Gimeson³, Andrey Kanygin⁴, Kevin Redding⁴, and Iftach Yacoby^{1†}
