## Accepted Manuscript

Computational modeling analysis of mitochondrial superoxide production under varying substrate conditions and upon inhibition of different segments of the electron transport chain

Nikolai I. Markevich, Jan B. Hoek

PII:	\$0005-2728(15)00063-8
DOI:	doi: 10.1016/j.bbabio.2015.04.005
Reference:	BBABIO 47452
To appear in:	BBA - Bioenergetics
Received date:	20 September 2014

Received date:20 September 201-Revised date:24 March 2015Accepted date:6 April 2015

Please cite this article as: Nikolai I. Markevich, Jan B. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## **ACCEPTED MANUSCRIPT**

## Computational modeling analysis of mitochondrial superoxide production under varying substrate conditions and upon inhibition of different segments of the electron transport chain.
