The Role of Connexin and Pannexin Containing Channels in the Innate and Acquired Immune Response

Silvana Valdebenito, Andrea Barreto, Eliseo A. Eugenin

PII: S0005-2736(17)30176-1
DOI: doi:[10.1016/j.bbamem.2017.05.015](https://doi.org/10.1016/j.bbamem.2017.05.015)
Reference: BBAMEM 82508

To appear in: *BBA - Biomembranes*

Received date: 19 January 2017
Revised date: 17 May 2017
Accepted date: 25 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

BBA: Membrane Channels Formed by Gap Junction Proteins

Editor: Dr. Herve Jean-Claude

**The Role of Connexin and Pannexin Containing Channels in the Innate and
Acquired Immune Response**

Silvana Valdebenito^{1,2}, Andrea Barreto^{1,2}, and Eliseo A. Eugenin^{1,2*}

Affiliation: ¹Public Health Research Institute (PHRI); ²Department of Microbiology, Biochemistry and Molecular Genetics, Rutgers New Jersey Medical School, Rutgers the State University of New Jersey, Newark, New Jersey, USA.

*Corresponding author: Eliseo Eugenin Ph.D., Public Health Research Institute (PHRI) and Department of Microbiology, Biochemistry and Molecular Genetics, Rutgers New Jersey Medical School, Rutgers the State University of New Jersey, Newark, New Jersey, USA. Email: eliseo.eugenin@rutgers.edu

Acknowledgments: We would like to thank National NeuroAIDS Tissue Consortium (NNTC) and CNS HIV Anti-retroviral Therapy Effects Research (CHARTER) for providing all human tissue samples described in this review. The National Institute of Mental Health grant, MH096625, and PHRI funding (to E.A.E).

Keywords: Apoptosis, AIDS, NeuroAIDS, anti-retroviral, cure.
