Tau/DDX6 interaction increases microRNA activity

Alban Chauderlier, Melissa Gilles, Andrea Spolcova, Raphaelle Caillierez, Maggy Chwastyniak, Michel Kress, Herve Drobecq, Eliette Bonnefoy, Florence Pinet, Dominique Weil, Luc Buée, Marie-Christine Galas, Bruno Lefebvre

PII: S1874-9399(18)30103-2
DOI: doi:[10.1016/j.bbagr.2018.06.006](https://doi.org/10.1016/j.bbagr.2018.06.006)
Reference: BBAGRM 1262
To appear in: *BBA - Gene Regulatory Mechanisms*
Received date: 11 March 2018
Revised date: 27 June 2018
Accepted date: 27 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Tau/DDX6 interaction increases microRNA activity

Alban Chauderlier*(1), Melissa Gilles*(1), Andrea Spolcova (1), Raphaëlle Caillierez (1), Maggy Chwastyniak (3), Michel Kress (4), Herve Drobecq (5), Eliette Bonnefoy (2), Florence Pinet (3), Dominique Weil (4), Luc Buée (1), Marie-Christine Galas (1), Bruno Lefebvre **(1)
