Linoleic acid permeabilizes gastric epithelial cells by increasing Connexin43 levels in the cell membrane via a GPR40- and akt-dependent mechanism

Carlos Puebla, Bruno A. Cisterna, Daniela P. Salas, Fernando Delgado-López, Paul D. Lampe, Juan C. Sáez

PII: S1388-1981(16)30023-3
DOI: doi: [10.1016/j.bbalip.2016.02.002](https://doi.org/10.1016/j.bbalip.2016.02.002)
Reference: BBAMCB 57897

To appear in: *BBA - Molecular and Cell Biology of Lipids*

Received date: 26 August 2015
Revised date: 25 January 2016
Accepted date: 6 February 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Linoleic Acid Permeabilizes Gastric Epithelial Cells by Increasing Connexin43 Levels in the Cell Membrane Via a GPR40- and Akt-Dependent Mechanism

Carlos Puebla^{1*}, Bruno A. Cisterna^{1,2}, Daniela P. Salas¹, Fernando Delgado-López³, Paul D. Lampe⁴, and Juan C. Sáez^{1,2*}

Keywords: polyunsaturated fatty acid (PUFA); FFAR1; connexon (hemichannel); transmembrane permeability; protein phosphorylation; Akt kinase, G protein-coupled receptor (GPCR).

Abbreviations used: Cx, connexin; DCFS, divalent cation-free solution; Etd⁺, ethidium; FFA, free fatty acid; GPCR, G-protein coupled receptor; GPR40, G-protein receptor 40; HC, hemichannel; LA, linoleic acid.
