

Accepted Manuscript

Calmodulin as a protein linker and a regulator of adaptor/scaffold proteins

Antonio Villalobo, Hiroaki Ishida, Hans J. Vogel, Martin W. Berchtold

PII: S0167-4889(17)30319-1

DOI: <https://doi.org/10.1016/j.bbamcr.2017.12.004>

Reference: BBAMCR 18223

To appear in:

Received date: 16 November 2017

Revised date: 7 December 2017

Accepted date: 8 December 2017

The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Bbamcr*(2017), <https://doi.org/10.1016/j.bbamcr.2017.12.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Calmodulin as a Protein Linker and a Regulator of Adaptor/Scaffold Proteins

Antonio Villalobo^{1*} Hiroaki Ishida², Hans J. Vogel^{2*} and Martin W. Berchtold^{3*}

Contents

1. Introduction: The many modes of calmodulin-target interactions and its function as a bridging and adaptor protein
2. Calmodulin as a linker protein
 - 2.1. Structural and functional features making calmodulin an ideal adaptor/bridging protein
 - 2.2. Inter-chain bridging mechanisms mediated by calmodulin
 - 2.2.1. Plant mitogen-activated protein kinase phosphatase 1
 - 2.2.2. Plant glutamate decarboxylase
 - 2.2.3. The estrogen receptor
 - 2.2.4. Calcineurin
 - 2.2.5. Small-conductance Ca²⁺-activated K⁺ channel
 - 2.2.6. Orai1 channel
 - 2.2.7. NMDA receptor
 - 2.2.8. Aquaporin-0
 - 2.2.9. Nuclear receptor interacting protein
 - 2.3. Intra-chain looping mechanisms mediated by calmodulin
 - 2.3.1. Voltage-dependent K⁺ channel 7.1
 - 2.3.2. Voltage-dependent Na⁺ channel 1.5
 - 2.3.3. Voltage-gated Ca²⁺ channels
 - 2.3.4. TRP channels
 - 2.3.5. Na⁺/H⁺-exchanger 1
 - 2.3.6. Bacterial adenylyl cyclases
 - 2.3.7. Munc13-1 protein
 - 2.3.8. HIV-1 Gag protein
3. Calmodulin-binding adaptor/scaffold proteins
 - 3.1. Protein kinase A anchor proteins
 - 3.2. Enkurin
 - 3.3. Grb7 family members
 - 3.4. Bcl10
 - 3.5. IQGAP1
 - 3.6. Shoc2
 - 3.7. FADD and TRADD
 - 3.8. 14-3-3 proteins
 - 3.9. IRS-1/2
 - 3.10. Chaperones Hsp70/Hsp90
 - 3.11. Striatin family members
 - 3.12. Myelin-binding protein
4. Other EF-hand Ca²⁺-binding proteins with Ca²⁺-dependent adaptor functions
 - 4.1. ALG-2
 - 4.2. Troponin C
 - 4.3. Centrin
 - 4.4. S100 proteins
5. Closing remarks and Outlook
6. References
