trans-Cinnamaldehyde stimulates mitochondrial biogenesis through PGC-1 α and PPAR β/δ leading to enhanced GLUT4 expression

Nicholas P. Gannon, Jamie K. Schnuck, Christine M. Mermier, Roger A. Vaughan, Carole A. Conn

PII: S0300-9084(15)00311-9

DOI: [10.1016/j.biochi.2015.10.001](https://doi.org/10.1016/j.biochi.2015.10.001)

Reference: BIOCHI 4841

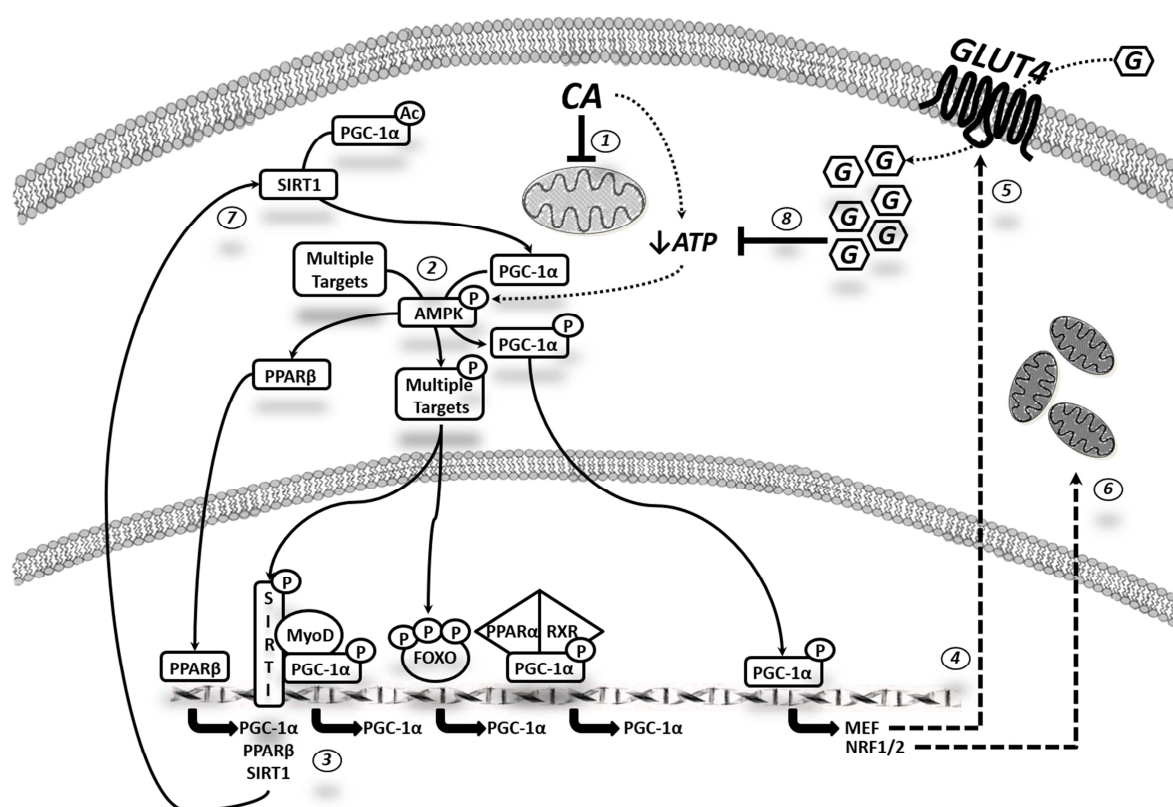

To appear in: *Biochimie*

Received Date: 15 July 2015

Accepted Date: 1 October 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
