Effects of hypoxia at different life stages on locomotory muscle phenotype in deer mice native to high altitudes

Kirsten E. Nickel, Naman K. Shanishchara, Catherine M. Ivy, Neal J. Dawson, Graham R. Scott

PII: S1096-4959(17)30182-3
DOI: doi:[10.1016/j.cbpb.2017.11.009](https://doi.org/10.1016/j.cbpb.2017.11.009)
Reference: CBB 10145

To appear in:

Received date: 15 September 2017
Revised date: 17 November 2017
Accepted date: 17 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effects of hypoxia at different life stages on locomotory muscle phenotype in deer mice
native to high altitudes**

Kirsten E. Nickel, Naman K. Shanishchara, Catherine M. Ivy, Neal J. Dawson,
and Graham R. Scott*
