Maternal betaine administration modulates hepatic type 1 iodothyronine deiodinase (Dio1) expression in chicken offspring through epigenetic modifications

Zhen Hou, Qinwei Sun, Yun Hu, Shu Yang, Yibo Zong, Ruqian Zhao

PII: S1096-4959(18)30014-9
DOI: doi:[10.1016/j.cbpb.2018.01.008](https://doi.org/10.1016/j.cbpb.2018.01.008)
Reference: CBB 10179

To appear in:

Received date: 7 November 2017
Revised date: 26 January 2018
Accepted date: 29 January 2018

Please cite this article as: Zhen Hou, Qinwei Sun, Yun Hu, Shu Yang, Yibo Zong, Ruqian Zhao, Maternal betaine administration modulates hepatic type 1 iodothyronine deiodinase (Dio1) expression in chicken offspring through epigenetic modifications. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Maternal betaine administration modulates hepatic type 1 iodothyronine
deiodinase (Dio1) expression in chicken offspring through epigenetic
modifications**
