Oceanographic upwelling conditions influence signaling pathways involved in muscle growth of intertidal fish

Rodrigo Zuloaga, Oscar Almarza, Juan A. Valdés, Alfredo Molina, José Pulgar

PII: S1096-4959(18)30016-2
DOI: <https://doi.org/10.1016/j.cbpb.2018.02.001>
Reference: CBB 10181

To appear in:

Received date: 2 November 2017
Revised date: 1 February 2018
Accepted date: 8 February 2018

Please cite this article as: Rodrigo Zuloaga, Oscar Almarza, Juan A. Valdés, Alfredo Molina, José Pulgar , Oceanographic upwelling conditions influence signaling pathways involved in muscle growth of intertidal fish. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Cbb(2018), <https://doi.org/10.1016/j.cbpb.2018.02.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

OCEANOGRAPHIC UPWELLING CONDITIONS INFLUENCE SIGNALING PATHWAYS INVOLVED IN MUSCLE GROWTH OF INTERTIDAL FISH.
