Comparative Proteomic Analysis of the Saliva of the *Rhodnius Prolixus*, *Triatoma Leticularia* and *Panstrongylus Herreri* Triatomines Reveals a High Interespecific Functional Biodiversity

Carlos Emmanuel Montandon, Edvaldo Barros, Pedro Marcus Vidigal, Maria Tays Mendes, Ana Carolina Borella Marfil Anhô, Humberto Josué de Oliveira Ramos, Carlo José Freire de Oliveira, Cláudio Mafra

PII: S0965-1748(16)30020-0

DOI: [10.1016/j.ibmb.2016.02.009](https://doi.org/10.1016/j.ibmb.2016.02.009)

Reference: IB 2818

To appear in: *Insect Biochemistry and Molecular Biology*

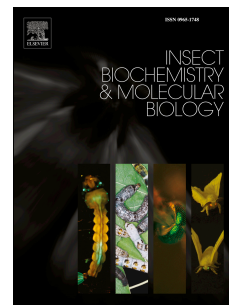

Received Date: 22 September 2015

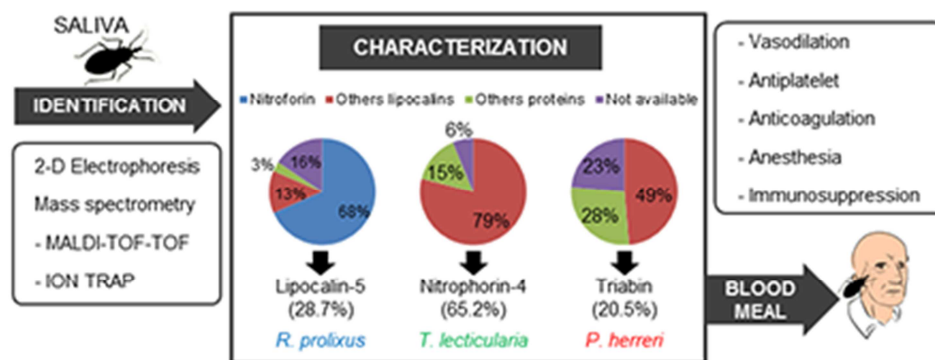

Revised Date: 10 December 2015

Accepted Date: 25 February 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
