

## Accepted Manuscript

Title: Ubiquitination: Friend and foe in cancer

Author: Mohammed A. Mansour

PII: S1357-2725(18)30129-8

DOI: <https://doi.org/10.1016/j.biocel.2018.06.001>

Reference: BC 5374

To appear in: *The International Journal of Biochemistry & Cell Biology*

Received date: 19-1-2018

Revised date: 31-5-2018

Accepted date: 1-6-2018

Please cite this article as: Mansour MA, Ubiquitination: Friend and foe in cancer, *International Journal of Biochemistry and Cell Biology* (2018), <https://doi.org/10.1016/j.biocel.2018.06.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Abstract

Dynamic modulation and posttranslational modification of proteins are tightly controlled biological processes that occur in response to physiological cues. One such dynamic modulation is ubiquitination, which marks proteins for degradation via the
