

## Accepted Manuscript

Title: NRF2 facilitates breast cancer cell growth via HIF1null-mediated metabolic reprogramming

Authors: Hong-Sheng Zhang, Guang-Yuan Du, Zhong-Guo Zhang, Zhen Zhou, Hong-Liang Sun, Xiao-Ying Yu, Yu-Ting Shi, Dan-Ning Xiong, Hu Li, Ying-Hui Huang

PII: S1357-2725(17)30329-1  
DOI: <https://doi.org/10.1016/j.biocel.2017.12.016>  
Reference: BC 5277

To appear in: *The International Journal of Biochemistry & Cell Biology*

Received date: 30-9-2017  
Revised date: 25-11-2017  
Accepted date: 19-12-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## **NRF2 facilitates breast cancer cell growth via HIF1 $\alpha$ -mediated metabolic reprogramming**

### **Highlights**

- NRF2 and HIF1 $\alpha$  up-regulated in breast cancer cells.
- Knockdown of NRF2 inhibited glycolytic enzymes expression.
- AKT activation and AMPK inhibition were required for NRF2-mediated up-regulation of glycolytic enzymes.
