Drug-loaded poly(L-lactide)/lignin stereocomplex film for enhancing stability and sustained release of trans-resveratrol

Rui Liu, Lin Dai, Zhufan Zou, Chuanling Si

PII: S0141-8130(18)32310-9

DOI: [doi:10.1016/j.ijbiomac.2018.08.040](https://doi.org/10.1016/j.ijbiomac.2018.08.040)

Reference: BIOMAC 10284

To appear in: *International Journal of Biological Macromolecules*

Received date: 13 May 2018

Revised date: 11 July 2018

Accepted date: 8 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Drug-loaded poly(L-lactide)/lignin stereocomplex film for enhancing stability and sustained release of *trans*-resveratrol

Rui Liu, Lin Dai,* Zhufan Zou, Chuanling Si
