

## Accepted Manuscript

Designing a novel signal sequence for efficient secretion of *Candida antarctica* lipase B in *E. coli*: The molecular dynamic simulation, codon optimization and statistical analysis approach

Parisa Ghahremanifard, Nasim Rezaeinezhad, Garshasb Rigi, Fatemeh Ramezani, Gholamreza Ahmadian

PII: S0141-8130(18)32264-5

DOI: [doi:10.1016/j.ijbiomac.2018.07.150](https://doi.org/10.1016/j.ijbiomac.2018.07.150)

Reference: BIOMAC 10194

To appear in: *International Journal of Biological Macromolecules*

Received date: 10 May 2018

Revised date: 21 July 2018

Accepted date: 23 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Designing a novel signal sequence for efficient secretion of *Candida antarctica* lipase B in *E. coli*: the molecular dynamic simulation, codon optimization and statistical analysis approach
