Eco-sustainable systems based on poly(lactic acid), diatomite and coffee grounds extract for food packaging

Ilaria Cacciotti, Stefano Mori, Valeria Cherubini, Francesca Nanni

PII: S0141-8130(17)34366-0

DOI: <https://doi.org/10.1016/j.ijbiomac.2018.02.018>

Reference: BIOMAC 9072

To appear in:

Received date: 6 November 2017

Revised date: 30 January 2018

Accepted date: 2 February 2018

Please cite this article as: Ilaria Cacciotti, Stefano Mori, Valeria Cherubini, Francesca Nanni , Eco-sustainable systems based on poly(lactic acid), diatomite and coffee grounds extract for food packaging. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Biomac(2017), <https://doi.org/10.1016/j.ijbiomac.2018.02.018>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Eco-sustainable systems based on
poly(lactic acid), diatomite and coffee grounds extract for food packaging
