Title: Injectable methylcellulose hydrogel containing calcium phosphate nanoparticles for bone regeneration

Authors: Min Hee Kim, Beom Su Kim, Hanna Park, Jun Lee, Won Ho Park

PII: S0141-8130(17)34364-7
DOI: <https://doi.org/10.1016/j.ijbiomac.2017.12.068>
Reference: BIOMAC 8729

To appear in: *International Journal of Biological Macromolecules*

Received date: 6-11-2017
Revised date: 8-12-2017
Accepted date: 11-12-2017

Please cite this article as: Min Hee Kim, Beom Su Kim, Hanna Park, Jun Lee, Won Ho Park, Injectable methylcellulose hydrogel containing calcium phosphate nanoparticles for bone regeneration, International Journal of Biological Macromolecules <https://doi.org/10.1016/j.ijbiomac.2017.12.068>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Full Paper**Injectable methylcellulose hydrogel containing calcium phosphate nanoparticles for bone regeneration**

Highlights

- Thermo-sensitive MC hydrogel containing CaP NPs was prepared via one-step synthesis.
- The MC hydrogel containing CaP NPs was effective in regeneration of new mature bone.
- Injectable MC hydrogel has a great potential for bone tissue regeneration.
